

Vascular Surgery

at Berkeley Outpatient Center

Overview

Vascular Surgery Services is one of several specialty services available at the Berkeley Outpatient Center. Our Vascular Surgeons work with referring providers to ensure patients receive the best care possible.

Conditions treated:

- Aneurysms
- Arterial and venous trauma
- Atherosclerosis
- Carotid artery disease (CAD)
- Compression disorders
- Dialysis access
- Deep vein thrombosis (DVT)
- Peripheral artery disease (PAD)
- Spider veins
- Varicose veins
- Venous ulcers and arterial and diabetic (neuropathic) wounds

When to see a physician:

Patients who experience any of the following symptoms should see a Vascular Surgery physician.

- Peripheral artery disease (PAD)
- Chronic limb ischemia
- Swelling and leg pain from lymphedema
- Deep vein thrombosis (DVT)
- Renal artery disease
- Pulmonary embolisms and blood clots
- Diabetic ulcers and venous leg wounds

For more information or to refer a patient, please call Vascular Surgery Services at [\(510\) 985-5200](tel:5109855200).
